## LIFE TONE<sup>®</sup> PAINTING INSTRUCTIONS

1. #100 BASECOAT SEALER — Spray entire fish with 2 or 3 light coats.

2. #702 PURE WHITE—Spray belly, lower fins, and inside of mouth. Mist two light coats instead of one heavy coat to prevent runs.

3. #404 BLACK GREEN—Spray on top of head, and around eye area, to blend in repaired areas.

4. #971 SILVER METALLIC—Spray over entire fish except lower belly. Keep spray light enough so that you can still see the stripe pattern. Mist pectoral, pelvic, and anal fins. (Figure 1)

5. #972 SILVER PEARL—Apply over all areas where #971 Silver Metallic was sprayed. Lightly mist over white on belly.

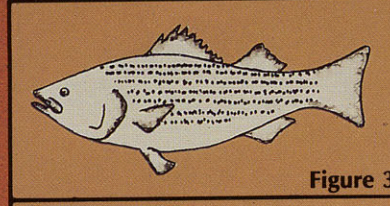

Figure 3

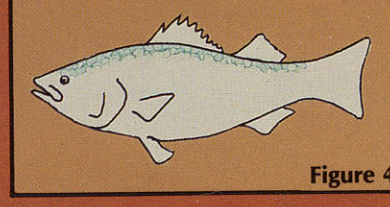

Figure 4

6. #301 BRIGHT YELLOW—Spray along top of back from head to base of tail. Very lightly mist gill cover, pectoral fins, and soft dorsal fin. (Figure 2)

7. #101 GILL RED—Spray gills. (Plug up mouth to prevent overspray.) Very lightly mist tail, dorsal fins, and vent.

8. #934 GOLD SPARKLE—Mist over top of back, and on gill cover.

9. #601 JET BLACK—Darken edges of fins, gill cover, and mouth. Angle spray fins to highlight rays. Darken the scale markings that show through the silver to make the stripes. (Figure 3)

10. #501 OCEAN BLUE—Mist a very light overspray on top of head, and along top of back. (Figure 4)

11. #200 GLOSS TOPCOAT — Spray 2 or 3 coats over entire fish.
